STEP TWO

Go to Wifi and Connect to your screen. Screen name and password will be shown below or provided by your Installer:

Screen ID: _____

Screen Password: _____

Be sure to look for a pop up from your phone stating 'this connection has no internet do you wish to stay connected'. Click this and say YES stay connected.

STEP THREE

Once connected you should see your screen in the device list as shown below. If it is not showing repeat STEP TWO.

STEP FOUR

You can control Brightness and set a timer to turn screen on/off using the two options below.

STEP FIVE

Select Program to send new content to your screen.

STEP SIX

Click on New Program to open Program Canvas Screen

STEP SEVEN

Click the + symbol to add artwork

STEP EIGHT

Select Image or Video depending what you wish to upload

STEP NINE

Select your image from the photo roll. Then make sure to click the green tick shown as **1** below, then click OK shown as **2** below to confirm

STEP TEN

Your image will now be showing. This image will always be stretched to fit the screen size so make sure to have the correct sized graphics ready to upload.

STEP ELEVEN

Simply click the Arrow Icon top right and this will send the content to your screen
